

A decorative border surrounds the page, featuring various blue and white snowflake designs. In the bottom-left corner, there is a stylized snowman wearing a black top hat and holding a broom. The background is a light blue gradient with small white dots.

Snow Event Information

Please remember to remove your vehicle from the street (if possible) whenever plowable snow is forecast. Vehicles parked along the curbs make it difficult for plow operators to clear the roads.

Please avoid driving on the roads during or immediately after a snowstorm. The less traffic our plow operators encounter, the more efficiently they can get the roads cleared.

DO NOT shovel or blow snow into public streets. This not only defeats the purpose of our snow plowing but creates unsafe conditions for all drivers. All shoveled or blown snow should be piled in your yard or in the area between the curb and sidewalk.

We will not clear driveway openings. During the course of plowing snow off of the roads, driveways may get plowed in (snow deposited in front of the driveway opening by plow trucks). This is unavoidable. When removing snow from your driveway, if you are facing the road, place the snow to the right of the driveway. This will allow for more efficient plowing and will help keep snow from ending up back in your driveway when the plow comes through the second time. To avoid shoveling your driveway entrance twice, wait until the plow truck is finished plowing the street before you shovel the end of your driveway. The plow truck operator has no choice in where to put the snow. It has to go off to the side of the road, which may include your driveway entrance.
